

Tips for you!

It's as easy
as this!

Just for you: the tipping programme

As a DPD delivery driver you do a great job - especially when the circumstances are difficult. Many of our shippers and consignees really value this, and are more than ever ready to show their appreciation. That's why we offer parcel consignees the opportunity to reward your exceptional performance quickly and easily: in our DPD App they can rate the delivery and give you a contact-free digital tip. No other parcel service is offering this!

So set up your tips account now - it's really easy.

This is how you register for the tipping programme

1. You need a PayPal account. Via www.dpd.de/trinkgeld you can register with PayPal free of charge. For this purpose you will need your bank account details. In addition, you need an email address to create a PayPal account. This can be with web.de, Google-mail, GMX or Outlook, for example. If you already have an address, please make sure that it has a serious designation, because after payment has been made the email address is visible to the consignee on the PayPal overview.
2. You fill out the attached registration form and hand it in at your depot. Your tips account will then be activated.

Confirmation and agreement

to the use of the DPD tipping programme :

Simply fill in the form and hand it in at the depot!

Yes, I confirm that I have created a PayPal account as described. This registration on the PayPal portal is to be used for the receipt of tips paid to me, and I hereby agree that DPD Deutschland GmbH can use my data to evaluate the frequency, type of amount and average level of the tips in a form which is exclusively anonymised.

I agree that until further notice DPD can use my name in the display of the tipping programme in the DPD App. I will direct any objections to the use of my data for these purposes to the responsible depot management.

I hereby also declare that I am aware of the tax regulations in relation to tips, and exempt DPD from any obligations in this respect. I am also aware of that fact that various data storage obligations apply to the processing of my data, and that errors in setting up the email address or other operating errors may lead to an incorrect financial settlement.

I agree that incorrect bank transfers should always be treated to my advantage.
